

CLAIMS

What I claim as my invention is:

1. An instrument holder providing an illumination source, comprising:
 - (a) A pistol shaped "grip" designed to ergonomically rest in the user's hand.
 - (b) Illumination means at the superior portion of the grip and a multi-position docking mechanism.
2. The instrument holder of claim 1 wherein the light source is positioned forward of the front grip and above the tip of the instrument providing light to the working area without obstruction of said light by the instrument.
3. The instrument holder of claim 1 wherein the multi-position docking mechanism provides a 15 – 60 degrees positioning, of a wide range of instruments, to the longitudinal axis of the light source.
